ELECTROMECSA is committed to meeting the requirements of stakeholders and legislation for:

Transport of workers and materials for the construction, maintenance and supervision of the proper operation of Traffic Light Signaling installations.

ELECTROMECSA is committed to continuous improvement of the Road Safety Management System, applying a procedure for the establishment and review of the Objective Objectives, which are:

- Compliance with legal and other requirements, related to its subject.
- Adherence to company procedures, regulations and policies.
- The selection of drivers and partners, properly trained, who meet all the conditions set by the company and the legislation.
- The continuous training and development of human resources in Road Safety matters.
- The use of appropriate, reliable, certified and up to date equipment.

The above is achieved through:

- The implementation of a Road Safety Management System in accordance with the requirements of the ISO 39001 standard.
- The definition of Road Safety objectives in its operations in order to enhance the satisfaction of the interested parties
- Defining responsibilities and powers.
- The control of the services and processes of the Road Safety Management System.
- The creation of a technologically modern and professionally suitable work environment.
- The commitment of the Administration to provide all the necessary resources in order to improve the implemented Road Safety Management System.

The Road Safety Policy is reviewed for its continued suitability and is sought to be understood at all levels of the organisation.
